John Reidy Named Managing Principal, Water Resources

Pape-Dawson Appoints John Reidy to Lead Water Resources Discipline

Longview, Texas (January 10, 2025) - Pape-Dawson Engineers is pleased to announce that John Reidy, P.E., has been named Managing Principal, Water Resources.

John became part of the Pape-Dawson team when KSA joined the firm in 2024. His 35-year career includes leading the successful delivery of large-scale infrastructure projects across the United States with values exceeding \$3 billion. In addition to his technical expertise as an engineer, he brings decades of experience managing business operations, developing new business opportunities, and providing organizational leadership for national and regional teams.

In his new role as Managing Principal, Water Resources, John will lead team operations, strategy, and recruiting efforts for the Water Resources discipline. His leadership will be instrumental as Pape-Dawson seamlessly integrates processes and teams with KSA.

“We are thrilled to have John join the Pape-Dawson team and are confident in his ability to continue the success of our Water Resources business line,” said Cara Tackett, P.E., Chief Operating Officer, Expanding Markets. “John aligns with Pape-Dawson's mission and culture focused on developing high-performing teams and maintaining long-term client relationships through excellence in engineering.”

###

About Pape-Dawson

Founded in 1965, Pape-Dawson Engineers is a leading provider of engineering and consulting services. The firm provides a comprehensive range of services, including civil and structural engineering, environmental, landscape architecture and planning, and surveying services for development and critical infrastructure projects. The firm's network of engineers, surveyors, technicians, landscape architects, environmental specialists, biologists, planners, and construction management professionals produce projects that impact both the quality of life and economic opportunities in the communities they serve.
