Pape-Dawson Relocates Atlanta Office to Support Growth

New space provides added capacity for continued growth in Georgia's capital city

ATLANTA, GA (November 16, 2026) - Pape-Dawson, a leading provider of civil engineering and professional services, has relocated its Atlanta office to 2970 Brandywine Road, Suite 200, just across the street from its previous location. The move accommodates the firm's continued growth in the Georgia market and marks another milestone in Pape-Dawson's ongoing evolution, reflecting its investment in its people, capabilities, and long-term presence in the region.

As Pape-Dawson continues to expand its geographic reach and service offerings, the new office provides space for the firm's growing team while supporting collaboration and continued service to clients throughout Georgia. The relocation reflects the momentum behind Pape-Dawson's presence in the state and its commitment to building on the local relationships and expertise that have shaped its work in the region. The Atlanta team's experience includes contributions to some of the city's most recognizable developments, including Ponce City Market, 1105 West Peachtree, and Grady Hospital's Correll Pavilion.

"As our team continues to grow, it's important that our spaces grow with us," said Kevin Edwards, P.E., Principal of Pape-Dawson's Atlanta office. "This move represents another exciting step in our story in Georgia while positioning us to best serve our clients and communities for years to come." Pape-Dawson's presence in Georgia includes nine offices across the state.

Pape-Dawson remains committed to supporting clients across Greater Atlanta and throughout Georgia, leveraging its integrated team and expanded capabilities to help deliver impactful infrastructure and development projects.

###

About Pape-Dawson
Founded in 1965, Pape-Dawson is a leading provider of engineering and consulting services. The firm provides a comprehensive range of services, including civil and structural engineering, environmental, landscape architecture and planning, and surveying services for development and critical infrastructure projects. The firm's network of engineers, surveyors, technicians, landscape architects, environmental specialists, biologists, planners, and construction management professionals produce projects that impact both the quality of life and economic opportunities in the communities they serve.
