Guy Humphrey Promoted to Senior Vice President

Pape-Dawson Proudly Announces the Promotion of Guy Humphrey

Houston, Texas (July 28, 2025) - Pape-Dawson is proud to announce the promotion of Guy Humphrey, P.E., to Senior Vice President. With nearly two decades of civil engineering experience, Guy is a key contributor to our residential land development team across the Greater Houston area.

Guy's career is underscored by the planning, design, permitting, and construction of numerous master-planned and residential communities. His portfolio includes signature projects, such as Riverstone, previously named the fastest growing master planned community in the nation, and Veranda, a dynamic residential development in Fort Bend County.

In addition to his engineering expertise, Guy is widely respected for his strategic input during the land acquisition and feasibility phases of development. He partners with clients early in the process to help assess property potential and align infrastructure solutions with long-term project goals.

In his new role as Senior Vice President, Guy will focus on guiding the continued growth of Pape-Dawson's residential practice, expanding client relationships, and mentoring the next generation of engineering leaders.

"Guy has established himself as a trusted advisor for his clients. He brings decades of experience and valuable insight to his project teams, helping mitigate risk and turn ambitious visions into reality," said DeKécha Sheperd, P.E., Senior Vice President. "He leads with clarity, integrity, and a strong sense of accountability, and I am confident in his ability to excel in this new role."

###

About Pape-Dawson

Founded in 1965, Pape-Dawson is a leading provider of engineering and consulting services. The firm provides a comprehensive range of services, including civil and structural engineering, environmental, landscape architecture and planning, and surveying services for development and critical infrastructure projects. The firm's network of engineers, surveyors, technicians, landscape architects, environmental specialists, biologists, planners, and construction management professionals produce projects that impact both the quality of life and economic opportunities in the communities they serve.
