Pape-Dawson Acquires Georgia-Based Gaskins + LeCraw

Pape-Dawson continues to expand its footprint in Georgia and Alabama

Marietta, GA (September 15, 2025) – Pape-Dawson has acquired Georgia-based civil engineering and surveying firm, Gaskins + LeCraw.

Gaskins + LeCraw provides civil engineering, surveying, permitting, landscape architecture, and planning services for a variety of municipal, educational, residential, commercial, and industrial clients in Georgia. With 176 employees across five offices in Georgia and one office in Alabama, Gaskins + LeCraw brings significant regional expertise that further strengthens Pape-Dawson's local presence.

This acquisition is Pape-Dawson's third in Georgia, building upon recent acquisitions of Maxwell-Reddick & Associates in 2024 and Eberly & Associates in 2025. Together, these teams bring decades of local experience and robust capabilities to deliver comprehensive solutions across the state.

"This acquisition represents another exciting step in our commitment to serving clients across Georgia," said Trey Dawson, President of Pape-Dawson. "Gaskins + LeCraw has built a strong reputation for excellence, which aligns with our values and vision for the future, and we're thrilled to welcome their talented team members to the Pape-Dawson family."

"By joining Pape-Dawson, we gain the resources of a national firm while maintaining the local expertise and client relationships that have been the foundation of our success," said Brandon Hutchins, President and CEO of Gaskins + LeCraw. "This partnership positions us to offer new opportunities for our employees and deliver even greater value to our clients."

###

About Pape-Dawson

Founded in 1965, Pape-Dawson is a leading provider of engineering and consulting services. The firm provides a comprehensive range of services, including civil and structural engineering, environmental, landscape architecture and planning, and surveying services for development and critical infrastructure projects. The firm's network of engineers, surveyors, technicians, landscape architects, environmental specialists, biologists, planners, and construction management professionals produce projects that impact both the quality of life and economic opportunities in the communities they serve.
