Prism Engineering Rebrands to Pape-Dawson

Prism Engineering establishes Pape-Dawson brand in Kentucky

LOUISVILLE, Kentucky (May 4, 2026) - Pape-Dawson, an Engineering News-Record Top International Firm, is proud to announce that Louisville-based Prism Engineering has rebranded and is now operating as Pape-Dawson.

Prism Engineering has long been recognized for its work in commercial, industrial, and residential development, with specialized expertise in programmatic retail and commercial projects. The firm joined Pape-Dawson earlier this year and has integrated business systems, processes, and teams to improve coordination and delivery for clients. The team will continue to leverage its deep local knowledge and established client relationships to deliver high-quality solutions across the Southeast region.

The rebrand marks Pape-Dawson's first established presence in Kentucky and follows recent rebrands in Tennessee, Georgia, and Florida, uniting Pape-Dawson's teams across the Southeast under one name.

“Bringing Prism fully into the Pape-Dawson brand streamlines collaboration and allows us to operate more efficiently as one team,” says Cara Tackett, Chief Operating Officer, Expanding Markets. “Our Louisville team brings deep local knowledge and expertise, now backed by additional resources to support clients on a nationwide scale.”

“For two decades, we’ve taken pride in being responsive, practical, and people-focused,” says Jason Hall, Owner of Prism Engineering, now Principal at Pape-Dawson. “We joined Pape-Dawson because they embody these same values, and we’re excited for the opportunity to bring that approach to our clients in new geographies while staying grounded in what’s made us successful.”

###

About Pape-Dawson

Founded in 1965, Pape-Dawson is a leading provider of engineering and consulting services. The firm provides a comprehensive range of services, including civil and structural engineering, environmental, landscape architecture and planning, and surveying services for development and critical infrastructure projects. The firm’s network of engineers, surveyors, technicians, landscape architects, environmental specialists, biologists, planners, and construction management professionals produce projects that impact both the quality of life and economic opportunities in the communities they serve.
